

Dishwasher Test

Objective

The test is to evaluate the corrosion resistance of ceramic non-stick coating after exposure to household dishwashers.

Apparatus

- Frying pans (or similar cooking surface)
- Household dishwasher
- Suitable dishwasher detergent

Procedure

1. Follow the dishwasher instruction to operate a dishwashing cycle.
2. Repeat the test for 100 cycles for the frying pan.
3. Examine the coating surface for any blisters, discoloration, rusting, and any other form of visible defect.
